PRECISE ANALYTICS LAB

Decade of Excellence in Offering Precise & Optimal Outputs

Pharma is not just any other industry that can compromise accuracy, this life-saving backbone of healthcare is built on accurate analytics and meddled with regulatory complexities. In this industry where even, the smallest error can have profound consequences, accuracy, reliability, and regulatory compliance are of crucial demand. Here, every milligram holds a critical key to drug efficacy and safety, and there should be no room for compromise. Among plentiful of analytical labs you find today, Precise Analytics Lab stands as an epitome of meticulous methodologies and innovative approaches for analytical excellence.

**Precise Analytics Lab is
trusted by Micro as well
as Major partners for
its precision, reliance &
affordability, making it a
reliable player in domestic
& international pharma
landscape**

The founders of Precise Analytics Lab experienced several challenges in manufacturing sites, quality control labs, and its licenses. It identified a gap in the prevailing systems to cope with precision standards. It became clear that there was a significant need for a centralized infrastructure to provide sophisticated analytical services. Hence, Precise Analytics Lab was conceived in 2009 to set a new standard in analytical methods, providing services not only to its parent company, Meyer Organics, and its affiliates but also to other MNCs operating in India.

With that said, the establishment of Precise Analytics Lab 15 years ago wasn't just a reaction to its internal needs; it was a visionary response set to revolutionize precision for the whole industry. They introduced a fresh perspective to reshape the landscape with a separate entity creating a win-win situation for the organization and the global pharma landscape.

The company has established its credibility by obtaining several certifications and accreditations. It was conferred with FDA certification for its regulatory adherence, and the lab underwent comprehensive internal and international audits, subsequently receiving accreditations of NABL for ISO/IEC 17025, BIS, APEDA, FSSAI, and FDA.

"Timely delivery of accurate results is the hallmark of the company, backed by an expert team and instruments catering to diverse industry requirements. The lab's commitment to staying at the forefront of technology is evident in its use of sophisticated instruments, such as LC and LC-MS MS, GC and GC-MS MS, and IC and ICP-MS, allowing for quantification at PPM (parts per million), PPB (parts per billion), and even PPT (parts per trillion) levels", shares Rajesh Tawade, Director.

One-Stop Solution Provider

The strength of Precise Analytics Lab is its robust R&D. It owns an Analytical Development Laboratory (ADL) that focuses on inventing new methods and improving existing ones. This initiative has helped them make techniques that are faster and more accurate, especially in finding impurities. Moreover, it boasts an impressive infrastructure with dedicated departments for ease of operation.

A unique proposition that sets Precise Analytics Lab apart is its contribution as a one-stop solution provider to the pharmaceutical industry. The company not only conducts regular testing but also specializes in validation processes, method development, and stability support. With an instrument range spanning from HPLCs to MS, it caters to all testing requirements from assays to impurities ensuring all requirements are not only met but exceeded.

One of the key differentiators is the stringent internal quality control measures implemented by the lab. From a well-defined quality management system to adherence to good laboratory practices (GLP) and regular staff training, the lab ensures that it consistently delivers correct results and maintains the highest standards of quality. Today it has positioned itself as a leader in identifying, isolating, and testing purity. Its ability to cater to a wide array of needs, from herbal and allopathic products to food and water industries, speaks volumes about its versatility and commitment to excellence.

Growth Trajectory, Global Reach, Roadmap

Since its inception, the company has witnessed exponential growth of almost 300 times. The company has evolved from a modest beginning to a whopping 8,000-square-foot facility. Based in the heart of Maharashtra, Mumbai, Precise Analytics Lab has become the preferred laboratory for international clients. With a reputation built over the years through word of mouth, the company is trusted by Micro as well as Major partners, making it a reliable player in the domestic and international landscape.

Looking ahead, Precise Analytics Lab has set its sights on strategic expansion. In the short term, the company aims to cater perishable samples into specific zones. Additionally, there are plans to establish a footprint in more states and offer a wider spectrum of services. In the long term, the company envisions tapping into international markets, further solidifying its position as a global leader in analytical services. As the company prepares to embark on its exciting phase of growth, the commitment to excellence, innovation, and customer satisfaction remains constant. With a vision to continuously evolve and adapt to the ever-changing landscape of the pharmaceutical industry, the company stands poised for even greater achievements in the years to come. **PO**
